

WHAT IS CLAIMED IS:

*Sub B2*  
1. In a V-blade plow having a pair of adjustable plow blades having inner ends hinged on a central pivot assembly, the improvement comprising a plowed material catcher member mounted below said central pivot assembly to prevent a trail of plowed material from passing through any space between the inner ends of said blades at any position of blade adjustment.

2. The invention defined in claim 1 wherein said catcher member includes an arcuate ramp surface portion projecting forwardly of said central pivot assembly and directing snow to said blades respectively.

3. The invention defined in claim 2 wherein said catcher member is made from a material selected from rubber plastic or metal.

*Sub B3*  
4. The invention defined in claim 2 wherein said arcuate ramp surface portion makes an angle to about 120°-130° to a surface being plowed.

*Add a2*
